Target branch:		Test scenario:	

Description

- while install mysql-community-server and mysql-community-client packages, i get following error:

```
Mixlib::ShellOut::ShellCommandFailed: apt_package[mysql-server] (mysql::install$
---- Begin output of apt-get -q -y install mysql-server=5.6.28-1ubuntu14.04 ----
STDOUT: Reading package lists...
Building dependency tree...
Reading state information...
The following extra packages will be installed:
 libaio1 mysql-client mysql-common mysql-community-client
 mysql-community-server
The following NEW packages will be installed:
 libaio1 mysql-client mysql-common mysql-community-client
 mysql-community-server mysql-server
0 upgraded, 6 newly installed, 0 to remove and 62 not upgraded.
Need to get 23.0 MB of archives.
After this operation, 164 MB of additional disk space will be used.
WARNING: The following packages cannot be authenticated!
 mysql-common mysql-community-server mysql-community-client mysql-client
 mysql-server
STDERR: E: There are problems and -y was used without --force-yes
---- End output of apt-get -q -y install mysql-server=5.6.28-1ubuntu14.04 ----
Ran apt-get -q -y install mysql-server=5.6.28-1ubuntu14.04 returned 100
```

- additional mysql-client and mysql-server packages cannot be authenticated and setup breaks!
- P.S. may be apt-key is wrong for mysql ubuntu
