

[mdbci] Maria DB Continuous integration tool - Task #8540

Pem generation fixies

03.08.2017 09:43 - Mark Zaslavskiy

Status:	Closed	Start date:	03.08.2017
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	mdbci features	Estimated time:	0:00 hour
Sprint/Milestone:	0.9	Spent time:	0:00 hour
Target branch:		Test scenario:	https://github.com/mariadb-corporation/mdbci/pull/21

Description

- Rename aws-config.yml to aws-config.yml.template and fix aws-config.yml generation at scripts/install_mdbci_dependencies.sh accordingly
- Extract 11-20 lines to separate script
https://github.com/mariadb-corporation/mdbci/blob/7979ba92fe5832d3980a1754a0002951ed1c416e/scripts/install_mdbci_dependencies.sh
- Check duplicated regions at aws-config.yml and .aws/config
