

[mdbci] Maria DB Continuous integration tool - Task #8546

Libvirt config should not contain mentions of aws config

07.08.2017 14:11 - Mark Zaslavskiy

Status: Closed	Start date: 07.08.2017
Priority: Normal	Due date:
Assignee: Timofey Turenko	% Done: 100%
Category: mdbci features	Estimated time: 3:00 hours
Sprint/Milestone: 0.9	Spent time: 0:00 hour
Target branch:	Test scenario: https://github.com/mariadb-corporation/mdbci/tree/8546_libvirt_config_without_aws_config https://github.com/mariadb-corporation/mdbci/pull/25 # For testing: 1. Generate correct aws config: ./mdbci --override --template ./confs/aws.json generate 8546_TEST # Result: generated and echo \$ == 0 2. Generate correct non-aws config: ./mdbci --override --template ./confs/docker.json generate 8546_TEST # Result: generated and echo \$ == 0 3. Generate incorrect config (which have different providers), for example, change ubuntu_xenial_aws in aws.json to centos_7_docker, then run: ./mdbci --override --template ./confs/aws.json generate 8546_TEST # As result: ERROR: Providers in the configuration file are different! Please correct their names and regenerate again.
